SPECIALIZED DISCLOSURE REPORT**

KOHL'S CORPORATION

(Exact name of registrant as specified in its charter)

Wisconsin	001-11084	39-1630919
(State or other jurisdiction of incorporation or organization)	(Commission File Number)	(IRS Employer Identification No.)
N56 W17000 Ridgewood Drive Menomonee Falls, Wisconsin		53051
(Address of principal executive offices)		(Zip Code)
Jason J. Kelroy (EVP, General Counsel & Secretary)		(262) 703-7000
(Name and telephone number, including area code, of the person to contact in connection with this report.)		

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017

Section 1 - Conflict Minerals Disclosure**Item 1.01 Conflict Minerals Disclosure and Report**

As provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD, a Conflict Minerals Report is provided as an exhibit to this Form SD and is available at the following website: <https://corporate.kohls.com/investors/corporate-governance>.

The information contained on our website is not incorporated by reference into this Form SD or our Conflict Minerals Report and should not be considered part of this report or the Conflict Minerals Report.

Item 1.02 Exhibit

The Conflict Minerals Report described in Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2 - Exhibits**Item 2.01 Exhibits**

Exhibit 1.01 - Conflict Minerals Report for the calendar year ended December 31, 2017.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Kohl's Corporation

/s/ Jason J. Kelroy

By: Jason J. Kelroy

Title: Executive Vice President,
General Counsel & Secretary

May 31, 2018

Date

EXHIBIT INDEX

<u>Exhibit</u>	<u>Description</u>
1.01	<u>Conflict Minerals Report for the calendar year ended December 31, 2017</u>

Exhibit 1.01

Conflict Minerals Report

Kohl's Corporation has included this Conflict Minerals Report as an exhibit to its Form SD for calendar year 2017, as provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended (collectively, the "Conflict Minerals Rule"). The date of filing of this Conflict Minerals Report is May 31, 2018.

Unless the context indicates otherwise, the terms "Kohl's," "we," "us" and "our" refer to Kohl's Corporation and its consolidated subsidiaries.

As used herein and consistent with the Conflict Minerals Rule, "Conflict Minerals" or "3TG" are columbite-tantalite (coltan), cassiterite, gold, wolframite and the derivatives tantalum, tin and tungsten, without regard to the location of origin of the minerals or derivative metals.

Forward-Looking Statements

This document contains "forward-looking statements" made within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "believes," "anticipates," "plans," "may," "intends," "will," "should," "expects" and similar expressions or the use of the future tense are intended to identify forward-looking statements. In addition, any statements that do not relate to historical or current facts or matters are forward-looking statements. Statements concerning current conditions may also be forward-looking if they imply a continuation of current conditions. Examples of forward-looking statements within this document include, but are not limited to, statements concerning the additional steps that we intend to take to mitigate the risk that our necessary 3TG benefit armed groups.

Forward-looking statements are subject to risks and uncertainties that could cause actual actions or performance to differ materially from those expressed in the forward-looking statements. These risks and uncertainties include, but are not limited to: (1) the continued implementation of satisfactory traceability and other compliance measures by our direct and indirect suppliers on a timely basis or at all; (2) whether smelters and refiners and other market participants responsibly source 3TG; and (3) political and regulatory developments, whether in the Democratic Republic of the Congo ("DRC") or an adjoining country (collectively, the "Covered Countries"), the United States or elsewhere. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of the filing of this document. We do not intend, and undertake no obligation, to publish revised forward-looking statements to reflect events or circumstances after the date of the filing of this document or to reflect the occurrence of unanticipated events.

Applicability of the Conflict Minerals Rule to Our Company

Kohl's is a leading omnichannel retailer with more than 1,100 stores in 49 states. We operate more than 1,100 Kohl's department stores, a website (www.kohls.com), 12 FILA outlets and four Off-Aisle clearance centers. Our Kohl's stores and website sell moderately-priced proprietary and national brand apparel, footwear, accessories, beauty and home products. Our Kohl's stores generally carry a consistent merchandise assortment with some differences attributable to local preferences. Our website includes merchandise that is available in our stores, as well as merchandise that is available only

online. Many of the products that we sell are third-party, national brand products that are available from many retailers, including Kohl's, and therefore not in-scope for purposes of our Conflict Minerals Rule compliance. We also sell proprietary brands that can be found only at Kohl's. Our proprietary brand portfolio includes well-known established private brands such as Apt. 9, Croft & Barrow, Jumping Beans, SO and Sonoma Goods for Life and exclusive brands that are developed and marketed through agreements with nationally-recognized brands such as Food Network, Jennifer Lopez, LC Lauren Conrad, Rock & Republic and Simply Vera Vera Wang.

We believe that we are subject to the Conflict Minerals Rule because of the degree of influence that we exercise over some of the materials, parts, ingredients or components of some of the proprietary brand products that are manufactured for us and that contain necessary 3TG. However, for some of our proprietary brand products, we exercise no influence over the materials, parts, ingredients or components of the products. Our involvement with those products is limited to having the manufacturer affix our proprietary brand name to the products. Those products and the related suppliers are therefore not in-scope for purposes of our compliance with the Conflict Minerals Rule. We do not manufacture any products.

We do not directly source 3TG from mines, smelters or refiners and believe that we are many levels removed from these market participants. However, through the efforts described below, we seek to ensure that our proprietary brand suppliers' sourcing practices are consistent with our Conflict Minerals Policy described below.

For 2017, notwithstanding our due diligence efforts discussed herein, we were unable to determine the origin of at least a portion of the necessary 3TG in each of the products that we contracted to manufacture. However, none of the necessary 3TG contained in our in-scope products were determined by us to directly or indirectly finance or benefit armed groups in a Covered Country. We did not conclude that any of our products were "DRC conflict free." The terms "armed group" and "DRC conflict free" have the meanings contained in the Conflict Minerals Rule.

Our Conflict Minerals Policy

We are committed to sourcing products from companies that share our values around human rights, ethics and environmental responsibility. To this end, we have adopted a company policy for the 3TG that are in our supply chain ("Conflict Minerals Policy"). The Conflict Minerals Policy includes, but is not limited to, our expectations that our suppliers:

1. Adopt and maintain a policy to reasonably assure that the 3TG in the products supplied to Kohl's are conflict free.
2. Establish their own due diligence programs to ensure conflict-free supply chains and take any other steps necessary to abide by the contractual certifications, warranties, covenants and representations provided to Kohl's. Supplier due diligence programs are expected to be designed in conformity with the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, including the Supplement on Tin, Tantalum and Tungsten and the Supplement on Gold (the "OECD Guidance").

3. Cooperate with our 3TG due diligence process, including by providing us, from time to time, with written certifications and other information concerning the origin of 3TG included in products supplied to Kohl's. As part of our process, suppliers of Kohl's proprietary-brand products will be expected to complete the Responsible Minerals Initiative's (the "RMI") Conflict Minerals Reporting Template ("CMRT").
4. Support industry efforts to enhance traceability and responsible practices in global mineral supply chains.

Under our Conflict Minerals Policy, we reserve the right to require from any supplier at any time such additional information, certifications and documentation as we deem necessary to monitor or assess compliance with the Conflict Minerals Policy or other contractual certifications, warranties, covenants and representations provided to us.

We do not seek to embargo the Covered Countries and encourage our suppliers to continue to source responsibly from the Covered Countries.

Reasonable Country of Origin Inquiry Information

As required by the Conflict Minerals Rule, for 2017, we conducted a "reasonable country of origin inquiry" ("RCOI"). For our RCOI, to the extent applicable, we utilized the same processes and procedures as for our due diligence, in particular Steps 1 and 2 of the OECD Guidance design framework, which are described below in this Conflict Minerals Report. The specific goal of our RCOI was to determine whether the 3TG in our in-scope products originated in a Covered Country.

Inquiries were made of all suppliers that provided Kohl's with proprietary brand products during 2017, regardless of whether the degree of influence we actually exercised over the materials, parts, ingredients or components of the products brought them in-scope for purposes of our compliance with the Conflict Minerals Rule. We refer below to our suppliers of proprietary brand products for 2017 as "Suppliers." For 2017, we reached out to 468 Suppliers that may have been in-scope.

The Suppliers identified to us 307 different smelters and refiners as potentially having processed the necessary 3TG contained in our potentially in-scope products. 245 of the smelters and refiners were listed as Conformant (as defined herein) by the RMI. Based on our reasonable country of origin inquiry, we concluded that 244 of these 307 smelters and refiners sourced entirely from outside of the Covered Countries. Our conclusion was based on analysis conducted by the service provider (the "Service Provider") that we retained to assist us with the collection, validation and review and analysis of the information received from the Suppliers. Some of the compliance activities described in this Conflict Minerals Report were performed by the Service Provider on our behalf.

Based on the results of our RCOI, we conducted due diligence for 2017. These due diligence efforts are discussed below.

Due Diligence Program Design

Design Framework

We designed our due diligence measures relating to 3TG to conform with, in all material respects, the criteria set forth in the OECD Guidance.

Selected Elements of Design Framework

The OECD Guidance established a five-step framework for due diligence as a basis for responsible global supply chain management of minerals from conflict-affected and high-risk areas. Selected elements of our program design are discussed below. However, these are not all of the elements of the program that we have put in place to help ensure that the 3TG contained in our products are responsibly sourced. The headings below conform to the headings used in the OECD Guidance for each of the five steps. Selected due diligence measures that we took in respect of 2017 are discussed under “Due Diligence Program Execution.”

1. OECD Guidance Step One: “Establish strong company management systems”
 - a. We have a Conflict Minerals Policy. The Conflict Minerals Policy is posted on our website at <https://corporate.kohls.com/content/dam/kohlscorp/non-press-release-pdfs/2014/ConflictMineralsPolicy-May2014.pdf>. The information contained on our website is not incorporated by reference into this Conflict Minerals Report or the Form SD and should not be considered part of this Conflict Minerals Report or the Form SD. The Conflict Minerals Policy is summarized earlier in this Conflict Minerals Report.
 - b. We have a working group led by our Executive Vice President, General Counsel charged with managing our 3TG compliance strategy. Some of the functional areas participating in the working group include Legal, Product Development and Social Compliance. We also include merchants and sourcing personnel in the compliance process. We supplement our compliance efforts with specialist outside counsel and the Service Provider.
 - c. We have communicated to our relevant merchants and other selected internal personnel our commitment to compliance with the Conflict Minerals Rule. We have done so by email, telephone and in-person meetings. In addition, our senior leadership, selected Product Development team members, merchants and selected other internal personnel are educated and briefed on the Conflict Minerals Rule and our compliance plan.
 - d. Our Merchandise Purchase Order Terms & Conditions contain terms to help ensure vendor compliance with our 3TG compliance expectations, including a provision requiring all suppliers to certify, warrant, covenant and represent that all merchandise sold to Kohl’s will be free of any 3TG financing conflict in the DRC or an adjoining country.
 - e. Through the Service Provider, we use the then latest Revision of the CMRT developed by the RMI to identify smelters and refiners in our supply chain.
 - f. Records of due diligence processes, findings and resulting decisions and any other business records relating to 3TG due diligence are retained for at least five years. These records are retained on our behalf by the Service Provider and are generally stored in an electronic format.

- g. We have mechanisms for employees, suppliers and other interested parties to report potential violations of our Conflict Minerals Policy, including email and telephone hotline reporting mechanisms. The email address is Governance@Kohls.com and the hotline number is (800) 837-7297.
2. OECD Guidance Step Two: "Identify and assess risk in the supply chain"
- a. The Service Provider requests by email that suppliers provide us with information, through the completion of a CMRT or its equivalent survey mechanism, concerning the usage and source of 3TG in their products, as well as information concerning the suppliers' related compliance measures. Both we and the Service Provider follow up multiple times, if required, by email or phone with suppliers that do not respond to the request within the specified time frame.
 - b. The Service Provider reviews the responses received from suppliers for plausibility, consistency and gaps. It follows up by email or phone with suppliers that submit a response that triggers any one of seven specified quality control flags.
 - c. Smelter and refiner information provided by suppliers is reviewed against the Service Provider's internal database. To the extent not in that database, it requests that the supplier confirm that the listed entity is a smelter or refiner.
 - d. Smelter and refiner information also is reviewed by the Service Provider against the lists of Conformant and Active (as defined herein), or the equivalent, smelters and refiners published by the RMI, the London Bullion Market Association ("LBMA") and the Responsible Jewellery Council ("RJC").
 - e. To the extent that a smelter or refiner identified by a supplier is not listed as Conformant or the equivalent by an independent third-party, the Service Provider attempts to contact the smelter or refiner to gain more information about its sourcing practices, including countries of origin and transfer and whether there are internal due diligence procedures in place or other processes that the smelter or refiner takes to track the chain of custody on the source of its 3TG. Internet research is also performed to determine whether there are any outside sources of information regarding the smelter's or refiner's sourcing practices.
 - f. If a supplier does not provide information concerning the processors of 3TG in its supply chain, the Service Provider requests information on the suppliers' Tier 2 suppliers. The Tier 2 suppliers, and subsequent tiers of suppliers as identified to the Service Provider, are then contacted by the Service Provider following the procedures described above.
 - g. Based on the information furnished by our suppliers, the Service Provider and other information known to us, we assess the risks of adverse impacts.

3. OECD Guidance Step Three: "Design and implement a strategy to respond to identified risks"
 - a. Our Executive Vice President, General Counsel charged with managing our 3TG compliance strategy periodically reports the findings of our supply chain risk assessment to other members of our senior leadership and to our Board of Directors or its Audit Committee.
 - b. We address identified risks on a case-by-case basis. This flexible approach enables us to tailor the response to the risks identified.
 - c. In addition, to the extent that identified smelters and refiners are not listed as Conformant, we seek to exercise leverage over these smelters and refiners to become Conformant through our participation in and support of the RMI. In addition, we also utilize information provided by the RMI to its members to monitor smelter and refiner improvement.
4. OECD Guidance Step Four: "Carry out independent third-party audit of supply chain due diligence at identified points in the supply chain"
 - a. In connection with our due diligence, we utilize and rely on information made available by the RMI concerning independent third-party audits of smelters and refiners to assess smelter and refiner due diligence and to determine whether the smelter or refiner is compliant with the applicable third-party conflict free certification.
 - b. We also support independent third-party audits by being a member of the RMI.
5. OECD Guidance Step 5: "Report on supply chain due diligence"
 - a. We file a Form SD and a Conflict Minerals Report with the Securities and Exchange Commission, and make available on our website information from the Form SD and the Conflict Minerals Report.
 - b. We include information concerning 3TG compliance in our Corporate Social Responsibility Report, which we make publicly available on our website.

Due Diligence Program Execution

In connection with our 3TG due diligence in respect of 2017, we performed the following due diligence measures. These were not all of the measures that we took in furtherance of our 3TG compliance program or pursuant to the Conflict Minerals Rule and the OECD Guidance. For a discussion of the design of our due diligence measures, please see "Due Diligence Program Design."

1. The Service Provider requested by email that the Suppliers provide us with a completed CMRT. An email also was sent that described our compliance program requirements and included a link to the Service Provider's on-line supplier education portal and contact email addresses and telephone numbers for obtaining answers to questions and/or guidance on completing our survey request.
2. The Service Provider followed up by email or phone with all Suppliers that did not respond to the request within a specified time frame. To the extent that, after the foregoing efforts, the Supplier did not provide the information requested, an escalation process was initiated. The escalation process consisted of direct outreach by our personnel or our representatives to the Supplier. Responses were received from 97% of the Suppliers.
3. The Service Provider reviewed the responses received from the Suppliers based on its internally-developed written review criteria for plausibility, consistency and gaps. As part of that review, if a Supplier indicated that there were no 3TG in the products that it supplied to us, the Service Provider reviewed those responses for plausibility and Suppliers were also given an opportunity to provide a certification of that determination. The Service Provider followed up by email or phone with the Suppliers that submitted a response that triggered specified quality control flags.
4. The Service Provider reviewed the smelters and refiners identified by the Suppliers against those contained in its internal database. To the extent not in that database, it requested that the Supplier confirm that the listed entity is a smelter or refiner.
5. With respect to those completed responses that identified a smelter or refiner, the Service Provider also reviewed that information against the lists of Conformant and Active, or the equivalent, smelters and refiners published by the RMI, the LBMA and the RJC. Of the 307 smelters and refiners identified by Suppliers as having potentially supplied 3TG contained in our in-scope products, 245 were listed as Conformant by the RMI as of April 23, 2018.
6. With respect to those smelters and refiners identified by a Supplier that were not listed as Conformant, the Service Provider attempted to contact the smelter or refiner and/or consulted publicly available information to attempt to determine the minerals processed by the smelter or refiner, the country of origin, whether the 3TG were from sources that directly or indirectly financed or benefitted armed groups in the DRC or an adjoining country and the smelter or refiner's due diligence measures.
7. For those Suppliers that did not provide information concerning the processors of 3TG in their supply chain, the Service Provider requested information on the Suppliers' Tier 2 suppliers. The Tier 2 suppliers, and subsequent tiers of suppliers as identified to the Service Provider, were then contacted by the Service Provider.
8. Our Executive Vice President, General Counsel charged with managing our 3TG compliance strategy periodically reported the findings of our supply chain risk assessment to other members of our senior leadership and to our Board of Directors or its Audit Committee.

9. We included information concerning 3TG compliance in our 2017 Corporate Social Responsibility Report, which is available at <https://corporate.kohls.com/content/dam/kohlscorp/2018/april/csr-report/2017%20Kohls%20CSR%20Report.pdf>.
10. In addition, to mitigate the risk that the necessary 3TG contained in our in-scope products directly or indirectly finance or benefit armed groups in the DRC or an adjoining country:
 - a. We joined the RMI.
 - b. As part of its outreach on our behalf, the Service Provider furnished the Suppliers with or made available to them written information discussing the Conflict Minerals Rule, the OECD Guidance and our compliance requirements.
 - c. Through the Service Provider, compliance training and other compliance resources were made available to our Suppliers. The training program was intended to help ensure the quality and completeness of the CMRTs received from the Suppliers.

Product and Smelter and Refiner Information

In-Scope Products

See "Applicability of the Conflict Minerals Rule to Our Company" for further information concerning our potentially in-scope products. For a further discussion of our products generally, see our Annual Report on Form 10-K for the fiscal year ended February 3, 2018. The information contained in our Form 10-K is not incorporated by reference into this Conflict Minerals Report or our Form SD and should not be considered part of this Conflict Minerals Report or our Form SD.

Identified Smelters and Refiners

The following table summarizes the smelter and refiner information provided by the Suppliers. See Annex A for a list of identified smelters and refiners and country of origin information. Annex A also contains additional information relating to the data presented in the table.

	Conformant	Active	Smelter Look-Up Tab List Only
Tantalum	38	0	0
Tin	69	1	9
Tungsten	41	0	5
Gold	97	6	41

We endeavored to determine the mine or location of origin of the necessary 3TG contained in our in-scope products by requesting that the Suppliers provide us with a completed CMRT and through the other procedures followed by us and the Service Provider that are described in this Conflict Minerals

Report.

None of the necessary 3TG contained in our in-scope products were determined by us to directly or indirectly finance or benefit armed groups in the Covered Countries. However, we did not have sufficient information to determine whether or not any of our products were “DRC conflict free.” The terms “armed group” and “DRC conflict free” have the meanings contained in the Conflict Minerals Rule.

Due to our position in the supply chain, which is discussed earlier in this Conflict Minerals Report, we rely on our Suppliers for accurate smelter and refiner information and our RCOI and due diligence measures do not provide absolute certainty regarding the source and chain of custody of the necessary 3TG contained in our in-scope products.

Future Risk Mitigation Efforts

We intend to take the following additional steps for 2018, either directly or through the Service Provider, to mitigate the risk that the necessary 3TG in our in-scope products benefit armed groups:

1. Encourage Suppliers that provided company level information for 2017 to provide product level information for 2018;
2. Engage with Suppliers that provided incomplete responses or that did not provide responses for 2017 to help ensure that they provide requested information for 2018; and
3. Communicate to new in-scope suppliers our sourcing expectations, including through the dissemination of the Conflict Minerals Policy to them.

All of the foregoing steps are in addition to the steps that we took in respect of 2017, which we intend to continue to take in respect of 2018, to the extent applicable.

Annex A

Capitalized terms used and not otherwise defined in this Annex have the meanings set forth in the Conflict Minerals Report of which this Annex is a part.

Smelters and Refiners

In connection with our reasonable country of origin inquiry or due diligence, as applicable, the Suppliers identified to us the smelters and refiners listed below as having potentially processed the necessary 3TG contained in our in-scope products in 2017. Please see the notes that accompany the table for additional information concerning the data in the table.

We note the following in connection with the above table:

- a. Not all of the included smelters and refiners may have processed the necessary 3TG contained in our in-scope products, since most Suppliers reported at a “company level,” meaning that they reported the 3TG contained in all of their products, not just those in the products that they sold to us. Some Suppliers also may have reported smelters and refiners that were not in our supply chain due to over-inclusiveness in the information received from their suppliers or for other reasons. In addition, the smelters and refiners reflected above may not include all of the smelters and refiners in our supply chain, since some Suppliers did not identify all of the smelters and refiners used to process the necessary 3TG content contained in our in-scope products, and not all of the Suppliers responded to our inquiries.
- b. The table only includes entities that were listed as smelters or refiners by the RMI.
- c. Smelter or refiner status information in the table is as of April 23, 2018.
- d. “Conformant” means that a smelter or refiner was listed as conformant with the RMI’s Responsible Minerals Assurance Process’s (“RMAP”) assessment protocols, including through mutual recognition. Smelters and refiners that are listed as “Re-audit in process” by the RMAP are considered to be Conformant by the RMAP. Included smelters and refiners were not necessarily Conformant for all or part of 2017 and may not continue to be Conformant for any future period.
- e. “Active” is a RMAP designation that means that the smelter or refiner is a participant in the RMAP and has committed to undergo an audit or is participating in a cross-recognized certification program.
- f. “Smelter Look-up Tab List Only” means that a smelter or refiner is listed on the Smelter Look-up tab list of the CMRT, but is not listed as “Conformant” or “Active.”

g. Smelter or refiner status reflected in the table is based solely on information made publicly available by the RMI, without independent verification by the Company.

h. Smelter and refiner country location is based on information published by the RMI, without independent verification by us.

Country of Origin Information

The identified countries of origin of the 3TG processed by the Conformant smelters and refiners listed in the table above may have included the countries in the categories listed below, based on information provided by the RMI to its members. The Company has not been able to reliably determine the country of origin of any of the other smelters or refiners listed in the table. The countries of origin below are categorized by risk level.

L1 - Countries that are not identified as conflict regions or plausible areas of smuggling or export of from the DRC and its nine adjoining countries: Argentina, Australia, Austria, Benin, Bolivia, Brazil, Burkina Faso, Cambodia, Canada, Chile, China, Colombia, Ecuador, Eritrea, Ethiopia, France, Germany, Ghana, Guatemala, Guinea, Guyana, Honduras, India, Indonesia, Japan, Kazakhstan, Laos, Madagascar, Malaysia, Mali, Mexico, Mongolia, Myanmar, Namibia, Nicaragua, Nigeria, Panama, Peru, Portugal, Russia, Senegal, Sierra Leone, Spain, Thailand, Togo, United Kingdom, United States of America, Uzbekistan, Vietnam and Zimbabwe.

L2 - Countries that are known or plausible countries for smuggling, export out of region or transit of materials containing 3TG: Mozambique and South Africa.

L3 - The DRC and its adjoining countries: Burundi, Rwanda and Uganda.

DRC - The Democratic Republic of the Congo.

Alternatively, or in addition, some of the Conformant smelters and refiners may have sourced from recycled or scrap sources.
